Contents of Volume 57

No. 1

G.A. Manley, A. Kaiser, J. Brix and O. Gleich *(F.R.G.)*
Activity patterns of primary auditory-nerve fibres in chickens: Development of fundamental properties 1

S.M. Shapiro and J.W. Conlee *(U.S.A.)*
Brainstem auditory evoked potentials correlate with morphological changes in Gunn rat pups 16

J.W. Conlee and S.M. Shapiro *(U.S.A.)*
Morphological changes in the cochlear nucleus and nucleus of the trapezoid body in Gunn rat pups 23

M. Ulfendahl, S.M. Khanna and Å. Flock *(Sweden, U.S.A.)*
Effects of opening and resealing the cochlea on the mechanical response in the isolated temporal bone preparation 31

P. Gil-Loyzaga, J. Gabrion, M. Remezal, B. Nguyen-Than-Dao and A. Uziel *(Spain, France)*
Incorporation of D-[^{3}H]-glucosamine and L-[^{3}H]-fucose into the developing rat cochlea 38

J.J. Eggermont *(Canada)*
Maturational aspects of periodicity coding in cat primary auditory cortex 45

G.K. Yates *(Australia)*
Auditory-nerve spontaneous rates vary predictably with threshold 57

M. Müller and D. Robertson *(Australia)*
Relationship between tone burst discharge pattern and spontaneous firing rate of auditory nerve fibres in the guinea pig 63

M. Müller and D. Robertson *(U.S.A.)*
Shapes of rate-versus-level functions of primary auditory nerve fibres: Test of the basilar membrane mechanical hypothesis 71

M. Ptok, T.S. Nair, R.A. Altschuler, J. Schacht and T.E. Carey *(U.S.A.)*
Monoclonal antibodies to inner ear antigens: II Antigens expressed in sensory cell stereocilia 79

D.M. Caird, A.R. Palmer and A. Rees *(F.R.G., U.K.)*
Binaural masking level difference effects in single units of the guinea pig inferior colliculus 91

A.S. Niedzielski and J. Schacht *(U.S.A.)*
Phospholipid metabolism in the cochlea: Differences between base and apex 107

D.E. Coling and J. Schacht *(U.S.A.)*
Protein phosphorylation in the organ of Corti: Differential regulation by second messengers between base and apex 113

R.A. Levine and P.J. Davis *(U.S.A.)*
Origin of the click-evoked binaural interaction potential, β, of humans 121

R. Pujol, G. Zajic, D. Dulon, Y. Raphael, R.A. Altschuler and J. Schacht *(U.S.A., France)*
First appearance and development of motile properties in outer hair cells isolated from guinea-pig cochlea 129

C.A. Prosen and D.B. Moody *(U.S.A.)*
Low-frequency detection and discrimination following apical hair cell destruction 142

Short Communication

G. Shone, Y. Raphael and J.M. Miller *(U.S.A.)*
Hereditary deafness occurring in cd/1 mice 153

No. 2

H. Hiel, A. Schamel, J.-P. Erre, T. Hayashida, D. Dulon and J.-M. Aran *(France)*
Cellular and subcellular localization of tritiated gentamicin in the guinea pig cochlea following combined treatment with ethacrynic acid 157

D.F. Roberson, P. Weisleder, P.S. Bohrer and E.W. Rubel *(U.S.A.)*
Ongoing production of sensory cells in the vestibular epithelium of the chick 166

J.J. Zwislocki, N.B. Slepecky, L.K. Cefaratti and R.L. Smith *(U.S.A.)*
Ionic coupling among cells in the organ of Corti 175

D. Berggren, T.R. Van De Water and M. Anniko *(Sweden, U.S.A.)*
Age-dependent disruption of basal lamina and extracellular matrix formation in L-proline analog treated otic explants 195

N.B. Slepecky and M. Ulfendahl *(U.S.A., Sweden)*
Actin-binding and microtubule-associated proteins in the organ of Corti 201

M. Knipschild, G.J. Dörrscheidt and R. Rübsamen *(F.R.G.)*
Setting complex tasks to single units in the avian auditory forebrain. I: Processing of complex artificial stimuli 216

M. Schäfer, R. Rübsamen, G.J. Dörrscheidt and M. Knipschild *(F.R.G.)*
Setting complex tasks to single units in the avian auditory forebrain. II: Do we really need natural stimuli to describe neuronal response characteristics? 231

W.T. Peake, J.J. Rosowski and T.J. Lynch III *(U.S.A.)*
Middle-ear transmission: Acoustic versus ossicular coupling in cat and human 245

P. Avan and P. Bonfils *(France)*
Analysis of possible interactions of an attentional task with cochlear micromechanics 269

Short Communication

J.E. Saunders, J. Emmanual and J.T. McElveen, Jr., *(U.S.A.)*
Triple fluorochrome labeling of cochlear bone growth 276
